Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Legare (5035094). Legare discloses a telescoping boom structure comprising a plurality of tubular boom sections 10,12,14,16 having different diameters, figure 2, and being concentrically nestable about a common displacement axis, figure 2, and having helical tracks, figure 2 through which adjacent tubular boom sections mutually engage one another for telescoping displacement along the common displacement axis, see abstract.

Allowable Subject Matter

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-13 are allowable over the prior art of record.
